Installation: 48" Clario Cloud

Required Tools

Drill

Drill Bits

Level

Laser Level

Cable Cutters

Glue

1 Position Clario Clouds and Mark Mounting Location

3form recommends creating a square template based on the outside dimension of the Clario Cloud, using something like a thin piece of wood or cardboard. Then using the dimensions provided here mark the pick points for your installation as needed. Multiple templates may be helpful with a larger installation of clouds. The pre-installed Clario Cloud Hooks can be used with a laser level to help determine the best anchoring locations for the site conditions.

Installation: 48" Clario Cloud

2 Install Cables and Eye Bolts into Mounting Surface (×3)

3 Attach Cable to Clario Cloud

- a** Mark lengths of the cables (depending on the chosen height) using a permanent marker.

Installation: 48" Clario Cloud

4 Level the Clario Cloud

Make sure cloud is level from all sides. Make micro adjustments at each ring gripper if needed.

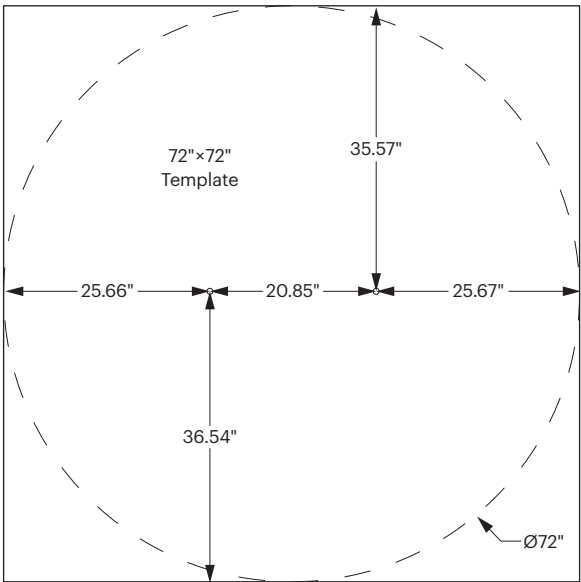

5 Trim Cables and Glue Ends

Installation: 72" Clario Cloud

1 Position Clario Cloud and Mark Mounting Locations

3form recommends creating a square template based on the outside dimension of the Clario Cloud, using something like a thin piece of wood or cardboard. Then using the dimensions provided here mark the pick points for your installation as needed. Multiple templates may be helpful with a larger installation of clouds. See top diagram for location of where the cables attach to the 4 Point Sputniks above the Clario Cloud to determine mounting location. For installations without Sputniks see lower diagram for hook locations.

* = Location where hooks are located

Installation: 72" Clario Cloud

2 Install Cables and Eye Bolt into Mounting Surface.

3 Assemble 4 Point Sputnik Hanging Anchor

3form recommends installing Sputnik with 30" from top of Clario Cloud to bottom of Sputnik, minimum distance of 20". If using a distance below the recommended 30" height the installer should plan on more time for installation and leveling of the system.

Top of Clario Cloud to Bottom of Sputnik	Cable Length* Perpendicular to Pattern Direction	Cable Length* Parallel to Pattern Direction
A	B	C
30" (recommended)	38.4"	39"
20" (minimum)	30.5"	31.2"

*Cable lengths are measured from the far end of the ring-side of the Ring Gripper (3-15-1989) to where the cable enters the Sputnik.

Installation: 72" Clario Cloud

3 Assemble 4 Point Sputnik Hanging Anchor *cont...*

a Insert $\frac{3}{64}$ " cables (3-15-1933) into base and attach base.

b Insert cable (3-15-1677) hanging from the ceiling.

4 Attach Cable to Clario Cloud

a Mark lengths of the cables (depending on the chosen height) using a permanent marker.

Thread cables through Ring Grippers (3-15-1989), pull through until Ring Gripper hits your mark.

Hook Ring Gripper to the Clario Cloud Hooks (attachment points on the cloud).

Installation: 72" Clario Cloud

5 Level the Clario Cloud

Make sure cloud is level from all sides. Make micro adjustments at each ring gripper if needed.

6 Trim Cables and Glue Ends

Product Description

Clario Cloud is a felt ceiling system that adds textures, color and acoustic performance to your space. The system is made from 16 or 24 individual fins that are assembled to create a beautiful aesthetic. Available in a variety of Sola Felt colors.

Available Finishes

Clario can be specified in a variety of color options.

See 3form's Sola Felt colors at:

<https://www.3-form.com/materials/sola-felt>
